# V.O.B. News

Life in the Tijuana River Aqueduct.

Wayne gets the food table ready while Vicente shares a few encouraging words and prayer.

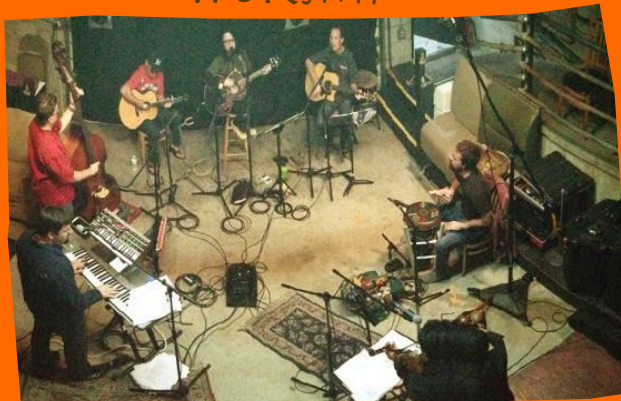

You have heard from us a few times regarding our friends who live in this concrete river bed. We wanted to give you an update about some progress made, that offers hope for these folks. Our partner, Vicente, along with **your help** and VOB sponsoring, has completed the Christian rehab. Several of the guys from the aqueduct have gone home with him, after our outreaches, and started their new life toward freedom in Christ! **The new rehab and infirmary are amazing! You should come see it!**

This guy took us behind one of the levy doors to show us where he and so many others live. Others wait on the truck to go to the new rehab.

## WORSHIP

Carol and her team recorded some live worship with other worship teams in the community. The project was called *The Warehouse Gatherings Vol. 1*. It was recorded at Lower Warehouse Recording, which is operated out of the [City of Refuge](#) warehouse where we store food and load our trucks for Mexico each week.

The worship recording is available to you as a **free** download online!

**Check it out!**

The contaminated water from all over TJ runs through these tunnels where they sleep.

You would think it would not be that hard to convince someone to go to the rehab for a warm clean bed. Addiction is a powerful force.
